CARROLL GARDENS

WESTMINSTER, MARYLAND

ADVANCE PRE-CATALOGUE OFFERING OF THE Finest Holland Top-Size Bulbs

One of the genuine delights of life is the appearance of early flowers that herald the coming of spring. When the snow is melting, the Snowdrops and Winter Aconites raise their strong little flowers and announce the beginning of spring. While they are still in bloom, Glory-of-the-Snow, Crocus, and Scillas appear as forerunners of the great army which is formed by Narcissi, Hyacinths, and Tulips in April and May. Even while the trees and shrubs are leafless, our gardens have become gay and colorful.

This pre-advance catalogue offers contains only a few of the hundreds of varieties of bulbs and plants that will be featured in our complete catalogue. Our new Fall catalogue will be larger and more complete than ever, featuring one of the world's finest collections of Tulips, Daffodils, Hyacinths, Crocus, and hundreds of other miscellaneous bulbs. Also a complete selection of Roses, together with perennials and many other items of interest for your garden. If there are any items you are interested in that you don't see listed in this folder let us know. No doubt we will be able to help you out.

GUARANTEE—Only top-size bulbs and plants are offered. Practically all bulbs offered are imported Holland grown, and you have the privilege of returning any unsatisfactory bulbs or plants that don't meet with your approval.

Special 10% cash discount if you send your order in before August 10th. Why not take advantage of this discount and send your order in as soon as you receive this folder?

CROCUS—ZONATUS

Besides the popular Spring Crocus, there are several interesting species that bloom much earlier, often before the snow is gone, and are very lovely and create much interest. And what is more, all are permanent, coming up year after year without much care. They are charming in the rock garden, planted between Sedums and other low creeping plants, and in front of and under shrubs.

The following selected list are the finest and the most beautiful of the many varieties available. We wish to call your particular attention to E. August Bowles and P. E. Bowles. They are exquisite. Of course, all the others merit a place in your garden.

Peonies—THE WORLD'S FINEST VARIETIES.

Peonies are long-lived plants that do not require transplanting unless they show signs of deterioration. For that reason it is worthwhile to be particular about the place where they are to be planted. Choose a sunny location that gets good drainage. Dig deep, and use some well-rotted cow manure or a commercial fertilizer to enrich the soil. Bone-meal is also recommended. The best months for setting out Peonies are September and October. Be careful

EREMURUS OR FOXTAIL LILIES

True aristocrats of the garden are the Eremurus or Foxtail Lilies. Coming as they do from the desert region of Turkistan, these Desert Candles are objects of curiosity in American gardens. They are hardy and dependable in the gardens, making a spectacular show from late May through June, and they come back year after year. Plant the plants in places deep in rich, porous, loamy soil. They are best planted in the fall, and after the plants have been in the ground for a year or two, they will produce a fine flower spikes, often 6 or more feet tall, like great tapering torches from a mass of foliage. The roots multiply rapidly and clumps of Desert Candles make an imposing mass in the garden and annuals may be planted close to them to fill the vacant space. For the past several years these magnificent plants have been very scarce and very expensive in cost. However, this year we are fortunate in being able to offer them at a very reasonable price to enable you to plant a small or large group of these aristocrats in your garden. They are much more effective when planted in groups of not less than three, and more whenever possible. It is no wonder these plants are expensive when you consider that it takes five years to grow a plant to blooming size. The plants we offer are five years old or more, and are of blooming size.

Shelford Hybrids

These beautiful hybrids come in many lovely shades of coppery pink, orange, pale yellow, pink, etc. These grow to an average height of 6 feet and make a stunning show in the garden, as well as cut flowers indoors, lasting two to three weeks in water.

not to place them too deep, for deep planting may keep them from blooming. The eyes should be only 2 inches below the soil surface. A Bordeaux mixture spray will control diseases that occasionally attack Peonies.

The list of varieties offered here is the very finest in their class, and in the double flowered group only the highest rated varieties are offered. The plants offered are strong 3-5 eye healthy plants, and should give excellent results.

These exquisite single peonies are very graceful and excellent in the garden. Due to their lightness of flowers and their stiff and graceful stems they stand up better than the Double Peonies. With their brilliant colors and shades they are unsurpassed for the perennial border and in front of and among shrubbery. They are of easy culture and bloom about the same time as Double Peonies. BEARDED IRIS (Also Known as German Iris)

Perhaps these are the best known Iris in cultivation. Practically everyone that has any ground at all around their home has a few clumps of these Iris. However, in the past several years so much work has been done to improve this group that we have varieties now that make it hard for us to believe our eyes when we see the gigantic blooms with many clear, beautiful colors and shades of breathtaking beauty.

These Iris are of easy culture doing well in practically any kind of soil. They are often naturalized in banks and along roadsides, and are excellent for making a soft yellow glow at the heart of a planting. They are also excellent for use in front of or in front of and among shrubbery. It is best to divide and replant every second or third year. This should be done between the middle of July to the middle of September. We strongly recommend that all the leaves be cleared off in the fall of the year and burned. By doing this you will destroy the bore which eliminates this insect that annually attacks the roots in the summer. The best time to plant these Iris is from late July to the middle of October. However, later in the fall and early spring are often times successful.

Possessing fine height, excellent branching, splendid forming form, it equals most of the newer Iris in size. We are glad to give this variety one of our strongest recommendations. \$1.00 each, 3 for \$2.75, 6 for \$5.00.
COPPER LUSTRE. 3 ft. Instantly distinguishable from other Iris is this large, odd and beautiful copper-toned Iris the whole overlain with a golden iridescence. A much liked Iris because of its unusual color. 75c each, 3 for \$2.00, 6 for \$3.50.
GARDEN MAGIC. 3 ft. One of the top light reds. Flowers of smooth, velvety-toned vivid red on medium tall stems. Rich color, good substance, good form. The flowers are full formed with hafts solidly colored red and more glossy velvety falls handsomely contoured by the rich beard. Not a fast grower, it takes about two years to give its best performance. \$1.25 each, 3 for \$3.25, 6 for \$6.00.
GOLDEN MAJESTY. 3 ft. One of the very fine golden yellow, it is glistening smooth and does not fade. Of gleaming gold the good sized blooms with splendid dome form are majestic and classic looking. One of the very finest Iris of its color in its price class. \$1.00 each, 3 for \$2.75, 6 for \$5.00.
GOLDEN TREASURE. 3 ft. An exquisite creamy yellow Iris with an out-pouring of rich golden-orange all about the central portion of the flower. An Iris of elusive charm, its loveliness seems to lie principally in its shimmering textures and in the subtle interplay of golden light through the center of the flower. The beard is bright orange. 75c each, 3 for \$2.00, 6 for \$3.50.
